

# Introduce Yourself | AIW 2025 Q3

Please leave a comment with:

1. Your name
2. Your professional background
3. How you currently use generative AI tools (if at all)
4. What you hope to gain from this course

If you find someone in a similar area, feel free to click on their profile and send them a friend request. Once they accept, you can send them direct messages on the platform.

Looking forward to learning together!

Warmly, The GRAPH Courses Team

My name is Gbadegesin Alawode, I am a Public Health Specilaist, Social Innovator and Researcher. I am new to Gen AI tools but happy to be enrolled on tjis course to gain first hand knowledge and skills on leveraging AI to improve my work. I am curious on how to use Gen AI to improve my productivity as well as conduct data analysis and visualization within the shortest possible time. I am also curious on how to use AI to create interactive chatbots to solve pressing public health and developmental problems.

Happy to connect with you all.

My name is Maisoon, I am a PhD student at the University of Geneva and also working in international organization . I think i currently use AI at a basic level :, the AI assistant in PDF to summarize and find answers in key documents, Chatgpt to expedite my searches and refine the R codes and that is it 😊  
looking forward to learning more
